

Job Title: DevOps Engineer

Have you wanted to be a part of a niche software company in the diverse and growing San Antonio Tech District? Do you want to be a part of a company with an Entrepreneurial culture and vision? Finally, do you really want to make a difference and be a part of the next iteration of software development? 6Connex, a leader in virtual events software, has an exciting opportunity for an AWS DevOps Engineer to help lead our growth. If the answer is yes to all three of these questions please read below.

Responsibilities:

- Develop and maintain automation tools for DevOps
- Responsible for CI/CD activities using GitHub, Jenkins, Ansible, and AWS OpsWorks
- Setup AWS environment, build jobs, pipelines for development and release process
- Develop performance monitoring dashboard and proactively manage capacity to support our business growth
- Work with developers and products to resolve issues related to development and production operation
- Work closely with the engineering and product teams to develop software applications from inception through completion
- Collaborate with stakeholders and project team to identify needs and gather requirements
- Advocate automation of every part of the software delivery lifecycle
- On-call pager requirement for all Devops Engineers. Rotation is every 4 weeks and is a requirement for the role
- Technical troubleshooting issues and help with remediating issues with sites.

Requirements:

- 3 to 4 years experience in DevOps
- Familiar with the CI/CD processes specifically with GitHub, Jenkins, and Ansible
- Familiar with AWS services: CodeBuild, CodePipeline, CodeDeploy, EC2, VPC, S3, EFS, RDS, Load Balancer, Auto Scaling, CloudFormation, AWS Cli, etc.
- Familiar with SaaS performance monitoring and capacity management tools and processes
- 3+ years experience with shell script and python
- Experience using Maven, Jenkins and Artifactory
- Experience with Terraform and other IaC solutions.
- Proficient in establishing, documenting and executing test strategies from business and functional requirements
- Familiar with Scrum/Agile methodologies and process
- Understanding and Comfortable with versioning control system: Git, Github
- Experience with tracking software (Jira)
- Unix/Linux command-line knowledge
- Ability to clearly communicate and be a champion of the user experience
- Should be a self-starter, quick learner; capable of setting priorities and remain efficient while multi-tasking.
- Proactively troubleshoot with developers, stakeholders, and designers to identify, and resolve issues.
